- Setting CSS styles preferences
- Creating a new CSS rule
- Setting CSS properties
- Editing a CSS rule
- Laying out pages with CSS
- Working with div tags
- Understanding document encoding
- Setting download time and size preferences
- Working with text
- Setting text properties in the property inspector

## Adobe Dreamweaver CS5

### INTRODUCTION

This course will offer students comprehensive coverage of Dreamweaver CS5 which is the leading professional Web design and development application in the market.

Students will be exposed to the Internet, Web sites, FTP, and the tools needed to create, maintain, and upload a private or commercial web site to a web server.

To help maximize the student's learning, this class will consist of lectures, digital media demonstrations, hand on exercises, group learning, discussions and real life community projects.

### COURSE OUTLINE

#### Workspace

- Dreamweaver workflow and workspace
- Working in the document window
- Using toolbars, inspectors, and context menus
- Customizing the dreamweaver CS5 workspace
- Keyboard shortcuts

#### Working with dreamweaver sites

- About dreamweaver sites
- Set up a local version of your site
- Connect to a remote server
- Set up a testing server
- Version control and advanced settings
- Manage sites dialog box options
- Import and export dreamweaver site settings
- Set site preferences for transferring files
- Managing contribute sites

#### Creating and managing files

- Creating and opening document
- Managing files and folders

- Getting and putting files to and from your server
- Checking in & checking out files
- Comparing files for differences
- Rolling back files
- Cloaking files and folders in your dreamweaver site
- Storing file information in design notes

#### Managing assets and libraries

- About assets and libraries
- Working with assets
- Creating and managing a list of favorite assets
- Working with library items

#### Creating pages with CSS

- Understanding cascading style sheets
- The CSS styles panel
- Enhancements to CSS3 support in the CSS styles panel
- Set CSS styles preferences
- Create a new CSS rule
- Set CSS properties
- Edit a CSS rule

- Create a link to a Word or Excel document
- Modify font combinations
- Adding and modifying images
- Adding video and sound
- Adding media objects
- Linking and navigating bars
- Setting up your coding environment
- Setting coding preferences
- Writing and editing code
- Collapsing code
- Optimizing and debugging code
- Editing code in design view
- Working with head content for pages
- Managing tag libraries
- Importing custom tags into dreamweaver

### WHO SHOULD ATTEND

- All students are expected to attend classes regularly and promptly, and for the duration of the scheduled instructional time. Individual instructors will decide the optimum time for taking attendance and may penalize for habitual lateness of absence.
